

Amphenol SOCAPEX

254 Series HE701/HE901

Board-to-Board Interconnect Solutions

www.amphenol-socapex.com

OUR COMPANY

Proven excellence in interconnect solutions

- Since **1947**, Amphenol Socapex has prescribed, designed and manufactured reliable and innovative interconnection solutions for harsh environments, specializing in standard and customized electrical and fiber optic connectors, contacts, accessories and cabling solutions.
- Located in the **Mont Blanc region** of France and Pune in India, Amphenol Socapex serve customers in over 100 countries around the world.
- Amphenol Socapex is part of the leading supplier of interconnect systems **Amphenol**.

1400+

Pune, **India**

Our expertise has no boundaries

Integrated Production in France & India

- 24 000 m² manufacturing capacity on 2 sites
- Design and manufacturing centers in France and India
- State-of-the-art manufacturing technology

Our markets

Defense

**Commercial
Aerospace**

Space

Industry

TECHNOLOGIES & INNOVATION

Engineering Laboratory

Product testing and qualification expertise in many fields:

- Environmental, mechanical, electrical, chemical, climatic skills
- RF and fiber optics expertise

High-Speed Expertise

Strong expertise in high-speed signals

- 3D EM simulation software & EM models
- Time Domain and frequency domain

Materials Expertise

Focus on materials expertise and manufacturing techniques to produce faster, smaller and stronger products

- Advanced technology research and development: polymers, metals, platings, resins ...
- Cutting edge characterizations of interconnects: Radio Frequency, partial discharges ...
- 3D CAD mechanical software, simulation & analysis

Eco-responsibility

Sustainable environment approach, with pro-active management of regulations (REACH / RoHS / Conflict minerals...)

- New materials development, plating, and suitable processes
- Recycling and rational resources consumption

Our workshops

Our workshops located in France & India provide consistent quality adapted to your volume requirements.

Automation & Tooling : Tools for our different activities : molding, machining, assembly

Molding : Solid expertise in thermoplastic elastomer and thermoset molding

Machining : Manufacturing of cylindrical shells and rectangular shells

Screw Machining : Manufacturing of electrical contacts

Plating : Plating with cadmium, nickel, electroless nickel, silver, black zinc nickel, gold

Assembly : Connector and harness assembly (electrical & optical)

Our certifications

Product certifications : MIL-DTL38999, EN3645, EN3155, VG (VG95328, VG95319, VG96944, VG95218, VG96949)

254 DF / HE901

Double-sided connectors for PCB

The 254 series is a double sided, 2,54 [.100] pitch, range of connectors for printed circuit boards.

Both direct or indirect connections could be made:

- For direct connection, the female receptacle mates with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board
- For indirect connection, the female receptacle mates with the male plugs

A well-proven technology

- The 254 series uses a 2,54[.100] pitch, double sided.
- The arrangements available are from 2x13 contacts to 2 x 55 contacts.
- The contact technology is based on a turning fork concept.

A simple choice of solutions, adaptable to all type of configurations

- For motherboard: female receptacles with straight PC tails (Y).
- For extender boards: female extender with right angle PC tails (YC).
- For mounting on cables: female receptacle with solder cup contacts (Z).
- In case of direct connection: the female receptacle mates directly with a 1,6 [.063] printed circuit board.
- In case of indirect connection, the male plug with SMT contacts (U) is used.
- Various polarization system are available (for both direct or indirect connection).

The 254 series complies with here below standards:

NFC/UTE 93-423
HE901

254 DF / HE901 >>> POLARIZATION

FOR DIRECT CONNECTION

Direct connection is made by a female receptacle directly mated with a 1,6 ± 0,2 [.063 ± .008] printed circuit board

With a loss of contacts

- A polarizing key is mounted in place of a contact pair, with a corresponding cut-out in the circuit board

Part number:

Width 1_{MAX} [.039]

Width 1,2_{MAX} [.047]

049534

021736

With a loss of contacts

- A polarizing key is mounted on the barrier between two contact cavities, with a corresponding cut-out in the circuit board
- 1: Polarising key mounted in a receptacle

Width 0,7_{MAX} [.028]

020917

FOR INDIRECT CONNECTION

Indirect connection is made by a female receptacle mated with a male plug (two-part connectors)

The polarizing system is done by:

A polarization part, mounted on the plug

A polarization part mounted on the receptacle

Polarization is made without loss of contacts

For female receptacle

- 2 guides (a)
- 10 keying fingers (b)
- 5 identified by letters, from A to E on one side
- 5 identified by figures, from 1 to 5 on the other side
- To key the connection, break off 1 to 3 fingers on each side (no matter the position)
- It is preferable to keep at least 2 fingers on each side, corresponding to the opened cavities on the plug system

Part number

254 DFD**E

For male plug

- 2 posts (c) for guiding
- 10 closed cavities (d)
- 5 identified by letters, from A to E on one side
- 5 identified by figures, from 1 to 5 on the other side
- To key the connection, open 1 to 4 cavities on each side (no matter the position) corresponding to the remaining fingers on the receptacle system

Part number

254 DFD**B

POLARIZATION SYSTEM FOR INDIRECT CONNECTION

Indirect connection is made by a female receptacle mated with a male plug (two-part connectors)

External dimensions - receptacle polarization system

- **: number of contacts
- Indirect connection is made by a female receptacle mated with a male plug (two-part connectors)
- Polarization system for receptacle equipped with straight PC tails (Y) or solder cup contacts (Z)
- Receptacle mounting details:
 - 15,24 [.600] spacing, enabling both orientation and polarization
 - 12,7 [.500] spacing, with orientation only, all fingers (a) in figure (1) removed
 - Mounting from front of panel
 - 1. See standard panel cut out detail page 10
 - 2. The polarizing system is fitted directly on to the receptacle, as in figure (1), and secured simultaneously
 - Mounting from rear of panel
 - 1. Maximum panel thickness: 2,5 [.098]
 - 2. See standard panel cut out detail page 10
 - 3. Break the skirts (f) + (g) on the polarizing system. The finger support abuts on the panel.
 - 4. Cut out greater than 14,5 [.571]. Break off the corner (f) of the polarizing system skirt.
- The receptacle is mounted from the rear of the panel, the polarizing system from the front, as shown in (2). The assembly is fixed together at either end.

254 DF / HE901 >>> TOOLING

REMOVAL TOOLS

WARNING: a contact extracted must not be used again

49532

- Contact removal tool for receptacles mounted one against the other
- Straight PC tails (Y) or solder cup contacts (Z)
- Front release

1. Insert the tool in the cavity, between the contact and the edge of the moulding, perpendicular to the mating face (1). The tip of the tool should be visible through the window in the moulding (a)
2. Push the tool home, keeping it perpendicular until it contacts the moulding (2)
3. Push the tool right over towards the outer edge of the mounting (2)
4. Pull the tool out, the contact will come with it

Part number

049532

20300

- Contact removal tool for receptacles mounted on 15,24 [.600] centres
- Straight PC tails (Y) or solder cup contacts (Z)
- Front release

(3): Respective position of tool and receptacle

1. Push the tool as far as it will go (4)
- The guide (c) abuts the bottom of the moulding
- The spigot (a) is opposite the slot (e)
2. Press on part (d) of the tool, the contact tongue is disengaged from its place
3. Cease pressing on part (d)
4. Withdraw tool and the imprisoned contact (5)

Part number

020300

20188

- Contact removal tool for receptacles mounted on 12,7 [.500] centres
- Straight PC tails (Y) or solder cup contacts (Z)
- Front release

(6): Respective positions of tool and receptacle (guide (c) along the axis of the connector)

1. Push the tool home (7)
- The guide (c) goes to the bottom of the moulding
- The spigot (a) is opposite the hole (e)
2. Press on part (d) of the tool, in the direction indicated by the arrow (7). The contact retention is released
3. Release pressure (d)
4. Pull back the tool with contact attached (8)
5. Remove the contact by turning it through 90°

Part number

020188

INSERTION TOOLS

49533

- Contact insertion tool for receptacles
- Straight PC tails (Y) or solder cup contacts (Z)

1. Insert the contact into the tool (9)
2. Insert the tool and contact together in the moulding cavity, from the board side, in the position shown on the figure (9)
3. Press the tool right home. The contact tongue positions itself in its slot (10)
4. Withdraw tool. The contact held by the tongue should remain in recess

Part number

049533

NOTES

254 / HE701

Single-sided connectors for PCB

The 254 series is a single sided, 2,54 [.100] pitch, range of connectors for printed circuit boards.

Both direct or indirect connections could be made:

- For direct connection, the female receptacle mates with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board
- For indirect connection, the female receptacle mates with the male plugs

A well-proven technology

- The 254 series uses a 2,54[.100] pitch, single sided
- The arrangements available are from 11 contacts to 47 contacts for 254 series and 6 contacts to 24 contacts for 508 series

A simple choice of solutions, adaptable to all type of configurations

- 2 receptacle versions are available:
 - Type A:
 - Floating contacts
 - Terminations in two rows, 2,54[.100] pitch
 - Type B:
 - Removable contacts
 - Terminations in two rows, 5,08[.200] pitch
- For motherboard: female receptacle with straight PC tails (Y)
- For mounting on cables: female receptacle with solder cup contacts (Z)
- For extender boards
 - Female extender with right angle PC tails (YC)
 - Type B only
 - Removable contacts
 - Terminations in two rows, 5,08[.200] pitch
- In case of direct connection: the female receptacle mates directly with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board
- In case of indirect connection, the male plug with right angle PC tails is used. 3 versions are available
 - A: standard types as per norm
 - B: open ended mounting ears
 - C: without mounting ears
- Various polarization system are available (for both direct or indirect connection)
- The 508 series is a derivate version of the standardized range, with only odd-numbered contacts mounted

The 254 series complies with here below standards:

NFC/UTE 93-421

- B = 68,4 [2.693] to 144,6 [5.693] (type B)

Plug:

- B = 53,1 [2.091] to 144,6 [5.693] (Type A)
- D = 45,5 [1.791] to 136,9 [5.390] (Type B)
- C = 35,95 [1.415] to 127,40 [5.016] (Type C)

508 series:

Connectors are made from the same mouldings and contacts as 254 series. Only odd-numbered contacts are mounted

Female contact

Floating lyre contact (Y & Z) for type A
Patented double lyre contact (Z, Z & YC) for type B

Material

- Copper alloy

Plating

- Terminations: gold over nickel
- Active contact area: gold over nickel

Materials

- Polarising key: thermoplastic
- Plastic insert: thermoset

Male contact

Material

- Copper alloy

Plating

- Terminations: gold over nickel
- Active contact area: gold over nickel

MECHANICAL CHARACTERISTICS	254 / HE701
Backoff ¹ (mm)	1.20 _{MAX}
Mating force per contact pair (N)	2.7 _{MAX}
Unmating force per contact pair (N)	
Contact retention in housing (N)	
Solder on wire	20 _{MIN}
Straight PC tail / SMT	20 _{MIN}
ENVIRONMENTAL CHARACTERISTICS	
Thermal shocks (°C)	-55 / +125
ELECTRICAL CHARACTERISTICS	
Current rating per contacts (A) direct connection	3
Current rating per contacts (A) indirect connection	5
Insulation resistance (GΩ)	5 _{MIN}
Contact resistance (mΩ)	10 _{MAX}
Capacitance between contacts (pF)	5 _{MAX}
Service voltage at 50Hz	200
Test voltage at sea level (Vrms)	900
Test voltage at 20 mbar (Vrms)	200

1: When both connectors are fully mated, the backoff is the maximum distance the connectors can be unmated while functioning properly

254 / HE701 >>> SIGNAL CONTACT

Direct connection is made by a female receptacle directly mated with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board

Indirect connection is made by a female receptacle mated with a male plug (two-part connectors)

FEMALE CONTACTS TYPE A

Floating contacts, terminations in two row, 2,54 [.100] pitch

Straight PC tail

- Thru hole soldering
- Used for direct connection: mate with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board
- Used for indirect connection: mate with male plug
- Mother board
- Termination section: $0,7 \times 0,7$ [.028 x .028]
- PCB thickness: 3,2 MAX [.126]
- Weight: 0,15g
- (a): insulated washer stuck on the underside of the end feet of connectors to enable board cleaning

Termination style

254 ** AF Y
HE701 EN ** Y

Solder cup

- Hard-soldering on wire
- O: 1 MAX [.039] on core section
- Used for direct connection: mate with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board
- Used for indirect connection: mate with male plug
- Weight 0,16g

Termination style

254 ** AF Z
HE701 EN ** Z

FEMALE CONTACTS TYPE B

Removable contacts, terminations in two row, 5,08 [.200] pitch

The mention → or ← means the contact removal direction

Straight PC tail

- Thru hole soldering
- Used for direct connection: mate with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board
- Used for indirect connection: mate with male plug
- Mother board
- Termination section: $0,6 \times 0,6$ [.024 x .024]
- PCB thickness: 3,2 MAX [.126]
- Weight: 0,27g
- To order the contact alone

Termination style

043247
254 ** BF Y
HE701 EV ** Y

Solder cup

- Hard-soldering on wire
- For soldering two wires, one of which can be a busbar joining adjacent connectors (supply, ground)
- Used for direct connection: mate with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board
- Used for indirect connection: mate with male plug
- Weight: 0,37g
- To order the contact alone

Termination style

042635
254 ** BF Z
HE701 EV ** Z

Right angle PC tail

- Thru hole soldering
- Used for direct connection: mate with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board
- Used for indirect connection: mate with male plug
- Extender board
- Weight: 0,31g

Termination style

254 ** BF YC01

254 / HE701 >>> SIGNAL CONTACT

Direct connection is made by a female receptacle directly mated with a $1,6 \pm 0,2$ [.063 \pm .008] printed circuit board
Indirect connection is made by a female receptacle mated with a male plug (two-part connectors)

MALE CONTACTS

Right angle PC tail

- Thru hole soldering
- Used for indirect connection: mate with female receptacle
- Daughter board
- Termination diameter: $0,9 \pm 0,05$ [.035 \pm .002]
- PCB thickness: 2,6 MAX [.102]
- (a): 1,9 [.075] over the moulding, $1,6 \pm 0,15$ [.063 \pm .006] over the contacts

Termination style	254 ** AM
	HE701 F ** Y

All dimensions are given for information only and are in mm [inch], except as otherwise specified

254 / HE701 >>> POLARIZATION

FOR DIRECT CONNECTION

Direct connection is made by a female receptacle directly mated with a $1,6 \pm 0,2$ [$.063 \pm .008$] printed circuit board

Polarizing key for female receptacle type A

- A contact is replaced by a metal key with a corresponding cut out of the printed board
- Width of key: $0,6 \pm 0,03$ [$.024 \pm .001$]

Part number

038366

Polarizing key for female receptacle type B

- A contact is replaced by a metal key with a corresponding cut out of the printed board
- Width of key: $0,7 \begin{smallmatrix} +0,15 \\ -0,1 \end{smallmatrix}$ [$.028 \begin{smallmatrix} +.002 \\ -.008 \end{smallmatrix}$]

Part number

042572

FOR INDIRECT CONNECTION

Indirect connection is made by a female receptacle mated with a male plug -two-part connectors)

Polarizing key for male plug / short contact*

- The polarizing keys are fitted to the male connector
 1. Remove a contact and replace it by the polarizing key
 2. Check that the polarizing key is correctly positioned and pinch it to retain it
 3. Remove the corresponding female contact from the receptacle
- Black colour

Part number

037742

Polarizing key for male plug / short contact*

- The polarizing keys are fitted to the male connector
 1. Remove a contact and replace it by the polarizing key
 2. Check that the polarizing key is correctly positioned and pinch it to retain it
 3. Remove the corresponding female contact from the receptacle
- White colour

Part number

041235

* Never mount a long polarizing key in place of a short contact and vice versa

254 / HE701 >>> 508 SERIES

508 SERIES

Connectors are made from the same mouldings and contacts as 254 series.
Only odd-numbered contacts are mounted

ABOUT AMPHENOL

Founded in 1932, **Amphenol** is one of the largest manufacturers of interconnect products in the world. The company designs, manufactures, and markets electrical, electronic, and fiber optic connectors, interconnect systems, and coaxial and specialty cables.

Amphenol has a diversified presence as a leader in high growth areas of the interconnect industry and provides solutions for customers in the automotive, broadband, industrial, information technology and data communications, military and aerospace, mobile devices, and mobile networks markets.
