

Amphenol SOCAPEX

PowerSafe

Derived from MIL-DTL-38999 Series III &
VG96944 Qualified

www.amphenol-socapex.com

OUR COMPANY

Proven excellence in interconnect solutions

- Since **1947**, Amphenol Socapex has prescribed, designed and manufactured reliable and innovative interconnection solutions for harsh environments, specializing in standard and customized electrical and fiber optic connectors, contacts, accessories and cabling solutions.
- Located in the **Mont Blanc region** of France and Pune in India, Amphenol Socapex serve customers in over 100 countries around the world.
- Amphenol Socapex is part of the leading supplier of interconnect systems **Amphenol**.

1400+
employees

175 M€
Net Sales 2024
75% Export - 25% France

Thyez, **France**
Pune, **India**

Our expertise has no boundaries

Integrated Production in France & India

- 24 000 m² manufacturing capacity on 2 sites
- Design and manufacturing centers in France and India
- State-of-the-art manufacturing technology

Our markets

Defense

**Commercial
Aerospace**

Space

Industry

TECHNOLOGIES & INNOVATION

Engineering Laboratory

Product testing and qualification expertise in many fields:

- Environmental, mechanical, electrical, chemical, climatic skills
- RF and fiber optics expertise

High-Speed Expertise

Strong expertise in high-speed signals

- 3D EM simulation software & EM models
- Time Domain and frequency domain

Materials Expertise

Focus on materials expertise and manufacturing techniques to produce faster, smaller and stronger products

- Advanced technology research and development: polymers, metals, platings, resins ...
- Cutting edge characterizations of interconnects: Radio Frequency, partial discharges ...
- 3D CAD mechanical software, simulation & analysis

Eco-responsibility

Sustainable environment approach, with pro-active management of regulations (REACH / RoHS / Conflict minerals...)

- New materials development, plating, and suitable processes
- Recycling and rational resources consumption

Our workshops

Our workshops located in France & India provide consistent quality adapted to your volume requirements.

Automation & Tooling : Tools for our different activities : molding, machining, assembly

Molding : Solid expertise in thermoplastic elastomer and thermoset molding

Machining : Manufacturing of cylindrical shells and rectangular shells

Screw Machining : Manufacturing of electrical contacts

Plating : Plating with cadmium, nickel, electroless nickel, silver, black zinc nickel, gold

Assembly : Connector and harness assembly (electrical & optical)

Our certifications

Product certifications : MIL-DTL38999, EN3645, EN3155, VG (VG95328, VG95319, VG96944, VG95218, VG96949)

Certified Management System

CUSTOMER EXPERIENCE

Service

► We have a strong reputation for helping customers solve their toughest challenges. This approach of serving your needs is ingrained in our company – from our sales team to our product development engineers.

A partner you can trust

Customer Proximity

Design Expertise

Quality Commitment

On Time Delivery Performance

Compliance management

Buy our solutions

You can access our solutions through our global network of sales offices or through our distributors.

Field Sales Team :

-  10 in France
-  15 in Europe
-  100+ in North America and rest of the world.
- 5 Business Development Managers supporting local sales force Europe, North America and the rest of the world

Technical Advisement & Multilingual Customer Service :

20 people

Worldwide Distribution Network :

Our range of circular connectors, contacts, fiber optic connectors, PCB connectors and accessories are available thru our extensive distribution network.

It includes qualified distributors (QPL approved) for assembling MIL-DTL-38999 & derivatives and PT/451 (VG95328) connectors.

NEW

OUR HISTORY

1947

- Socapex creation in Suresnes, France
- 1st radio connector

1956-57

- Manufacturing unit in Cluses (74), France
- Thomson-CSF becomes primary shareholder

Early 1960's

- 1st board level connectors: HE8
- 1st "licence Bendix" manufactured connectors
- SL Series

1973

- New factory in Thyez (74) France with 250 people, 13 000m²

1975

- Production of 38999 connectors

1986

Amphenol
Socapex

- Amphenol becomes primary shareholder

1995-96

- Expanded Beam connector CTOS launch
- Headquarters transferred to Thyez

2004

- RJ Field Electronica launch, "Award"

2005

- New factory in Pune, India

2010's

- LuxBeam™ and HDAS launch

2014-2017

- New workshops :
- Cable Assembly & Contact Manufacturing workshop

2019

- Increased manufacturing capacity with 2nd building in Pune, India

2022

- Harness in the box solution launch

Today & tomorrow

- New technologies :
- Investment in automation & technical expertise

- Amphenol SOCAPEX joins the "Convention des Entreprises pour le Climat".
- Our goal: to accelerate our transition to a more sustainable operation.

POWERSAFE / VG96944 - GENERAL CHARACTERISTICS

Power connector qualified VG96944 and designed for user safety

Description

PowerSafe connectors are derived from MIL-DTL-38999 Series III connectors and dedicated to high power supply in harsh environments. These connectors provide the user with, the highest user safety, shielding effectiveness & environmental performances. PowerSafe connectors follow the European standard for power equipment DIN EN 61984 (former VDE 0627).

Applications

- Power connectors deployed on the field (drums)
- Electrical power generator
- Power Supply requiring User safety
- Power Distribution Units requiring User safety
- Power supply close to electronic devices
- Heavy duty Power supply for any use
- Uninterruptible Power Supply requiring User safety
- VG qualified architecture
- Line Replaceable Unit (LRU)

LRU application

POWERSAFE / VG96944 - GENERAL CHARACTERISTICS

Power connector qualified VG96944* and designed for user safety

Main features

TWO INSERTS TYPES WITH DIFFERENT CHARACTERISTICS

- “E” inserts – up to 200°C & CTI (Comparative Tracking Index) $\leq 100V$

Available in Amphenol Proprietary designations only

- “V” inserts – VG96944 compliant – up to 150°C & CTI $\leq 400V$ (Material Group II)

Available in VG designations & Amphenol Proprietary ones

FIRST MATE/LAST BREAK: one earth contact directly linked to the shell, stays in place even in case of burning.

LAST MATE/FIRST BREAK: one pilot contact with a breaking capacity (brings the information to a relay to turn on/off the power).

These features protect the user even if the connectors are mated or unmated. Amphenol recommends to connect / disconnect connector when unloaded.

IP2X WHEN UNMATED (SOCKET), IP68 WHEN MATED

HIGH ROBUSTNESS AND EXCELLENT ENVIRONMENTAL PERFORMANCES.

SEVERAL MATERIALS & PLATING

- Aluminum (Olive drab Cadmium, Nickel, Black Zinc Nickel, Tin Zinc platings)
- Marine Bronze
- Stainless steel (Passivated, Nickel plated)

EMI/RFI PROTECTION : Shell to shell bottoming and grounding fingers on the plug shell

ACCESSORIES:

- Caps: compatible with MIL-DTL-38999 Series III caps.
- Backshells: compatible with AS85049 backshells for MIL-DTL-38999 Series III connectors, VG95319-1011G, as well as TV35 & TVNSA backshells.

Same panel drilling as standard MIL-DTL-38999 Series III receptacles.

Added benefits

- PowerSafe is compliant with **IP2X Electrical Safety standard (socket side)**, which guarantees touch-proof protection of live parts.
- Qualified according the most stringent standard **VG96944*** (applicable to Aluminum with Olive Drab Cadmium or Tin Zinc finish and Marine Bronze versions only).
- Safety use design following **DIN EN-61984 (former VDE 0627)**.

Concept

* Contacts arrangement 13-V4 / 17-V6 / 25-V6 are VG96944 Qualified

POWERSAFE / VG96944 - LAYOUTS & ELECTRICAL CHARACTERISTICS EQUIPPED WITH POWER CONTACTS

Amphenol **PowerSafe** range offers 7 contact arrangements to fit all your power needs, with single-phase & three-phase layouts, and a choice of 2 insert materials for each layout depending on the need :

→ **E** inserts : using the same material than Amphenol Socapex 38999 series connectors and able to withstand a temperature up to 200°C, its CTI is $\leq 100V$. Dielectric Withstanding Voltage (DWV) limit have been tested on E inserts in accordance with test procedure **EIA-364-20F** with maximum voltage applied of 4500 VRMS.

→ **V** inserts : developed according to VG96944 standard with a material less impacted by the disconnection under load (avoid arcing when disconnecting under load). Able to withstand a maximum temperature of 150°C & have a CTI $\leq 400V$ (Material Group II according to DIN EN60664-1 (VDE 0110-1):2008-01,4.8.1.3). V inserts have been tested according to VG96944 and DWV limit have been set up to 2500 VRMS.

Single-Phase Layouts

E insert	13-E4	15-E4	21-E4	23-E4
V insert	13-V4	15-V4	21-V4	23-V4
Pilot contact (P)	1 Size 20	1 Size 16	1 Size 16	1 Size 16
Phase & neutral (N & L)	2 Size 16	2 Size 12	2 Size 6	2 Size 4
Protective contact (PE)	1 Size 16	1 Size 12	1 Size 6	1 Size 4

Contact Arrangements	Pilot contact - P		Phase, Neutral and Protective contact - N, L & PE		DWV (VRMS) *
	Contact rating (A)	Operating Voltage (VRMS)	Contact rating (A)	Operating Voltage (VRMS)	
13-E4	0,5	60	16	1000	3300
15-E4	0,5	60	25	1000	3300
21-E4	0,5	60	63	1000	3300
23-E4	0,5	60	84	1000	3300
13-V4	0,5	60	16	250	1500
15-V4	0,5	60	25	250	1500
21-V4	0,5	60	63	500	2500
23-V4	0,5	60	84	500	2500

Three-Phase Layouts

E insert	17-E6	23-E6	25-E6
V insert	17-V6	23-V6	25-V6
Pilot contact (P)	1 Size 16	1 Size 16	1 Size 16
Phase & neutral (N & L)	4 Size 12	4 Size 8	4 Size 6
Protective contact (PE)	1 Size 12	1 Size 8	1 Size 6

Contact Arrangements	Pilot contact - P		Phase, Neutral and Protective contact - N, L1, L2, L3 & PE		DWV (VRMS) *
	Contact rating (A)	Operating Voltage (VRMS)	Contact rating (A)	Operating Voltage (VRMS)	
17-E6	0,5	60	25	1000	3300
23-E6	0,5	60	47	1000	3300
25-E6	0,5	60	63	500	2500
17-V6	0,5	60	25	500	2500
23-V6	0,5	60	47	500	2500
25-V6	0,5	60	63	500	2500

* : Test voltage in mated condition for Phase, Protective and Neutral pin & socket contacts, and Pilot pin contacts. Test voltage in unmated condition for Pilot socket contact only.

HEAT RISE & DERATING CURVES GENERATED ACCORDING TO EIA-364-70D, METHOD 2

This procedure establishes the test procedures for determining temperature rise versus current. Heat Rise explains how the current passing through generates heat at the contact point, causing the temperature to rise while derating tests explain how the maximum current rating of the contacts decreases as the ambient temperature increases. Overall, this gives a good overview of the connector performance. The mated samples are placed in an enclosure to reduce air disturbance. The connectors are powered with a serial circuit between several contacts, according to the arrangement. The current is applied by step of 5 A, starting from the current prescribed for the contact resistance measurements. During the current application, the heating of the sample is measured with thermocouples connected to an acquisition unit.

Heat Rise & Derating mated pair

POWERSAFE / VG96944 - LAYOUTS & ELECTRICAL CHARACTERISTICS

Layouts able to accomodate Temper Grip contacts & High current Pin*

Single-Phase Layout

E insert	23-E4T
V insert	23-V4T
Pilot contact (P)	1 Size 16
Phase & neutral (N & L)	2 Size 4
Protective contact	1 Size 4

Three-Phase Layout

E insert	23-E6T
V insert	23-V6T
Pilot contact (P)	1 Size 16
Phase & neutral (N & L)	4 Size 8
Protective contact	1 Size 8

* Amphenol Socapex Temper-Grip socket contact and high-current pin Size 12 are under development

Contact Arrangements	Pilot contact - P		Phase, Neutral and Protective contact - N, L &		DWV (VRMS)
	Contact rating (A)	Operating Voltage (VRMS)	Contact rating (A)	Operating Voltage (VRMS)	
23-E4T	0,5	60	120	1000	3300
23-E6T	0,5	60	70	1000	3300
23-V4T	0,5	60	120	500	2500
23-V6T	0,5	60	70	500	2500

Amphenol Socapex Temper-Grip socket contacts have a high-current technology designed for use in high-temperature applications and is available with most Amphenol connectors. Temper-Grip contacts can increase ampacity by up to 40 %, allowing the increase the value of your system or potentially downsize your cable size and the space you occupy on your panel.

POWERSAFE / VG96944 - JAM NUT REDUCED FLANGE RECEPTACLE

Reduced flange receptacles are derived from 38999 series III Jam nut receptacles and dedicated for applications where size & weight are critical, offering un smaller footprint and higher contact density

Main features

- For Jam nut receptacle (TV07/TVS07).
- Higher density on panel: **41% average footprint surface less.**
- Lighter: **20% average lighter than standard 38999**
- Mates with standard **PowerSafe** plug and caps.
- Matches the **PowerSafe** performances.
- Improved design of the o'ring groove allowing the o'ring to stay in place.

With Castle nut*

*Please consult us if you need a safety castle nut with lock (wiring possibility)

POWERSAFE / VG96944 - BACKSHELLS

TV NSA Backshells

These backshells ensure the shielding by clamping the braid with a screwing system. The free inner ring avoids twisting of the braid during screwing (double conus style).

See part how to order page 19

Shell size	A Thread Metric	B max	Ø C max	Ø D max	Ø E max	Ø G max
13	M18 x 1.0-6H	26	12.7	28.1	21.2	22.6
15	M22 x 1.0-6H	29	14.8	31.1	25.1	25.8
17	M25 x 1.0-6H	32	17.9	34.1	28.1	29.0
21	M31 x 1.0-6H	39	23.1	41.1	34.1	35.2
23	M34 x 1.0-6H	42	26.2	44.1	36.9	38.4
25	M37 x 1.0-6H	45	28.8	49.1	39.9	41.5

Use Straight Shrink Boots 202K121-12 (size 13), 202K132-12 (size 15 and 17), 202K153-12 (size 21, 23 and 25) and S1255 Adhesive

TV NSA Installation instructions

1. Prepare the cable for termination process and slide the items onto the cable in the order shown on figure 1.

2. Screw the backshell at the rear of the connector. The best performance in time of the system « connector + rear accessory » consists in applying the torque value to screw then unscrew, to apply the torque value & screw a second time, then to unscrew and finally screw the torque value a third time.

3. Fold back the braid on the outer jacket and fix it (figure 2)

4. Install the braid as shown on figures 3 and 4: Release the braid and cover the backshell (a) and the connector's shell. Slide the first ring (b) over the braid. Fold back the braid on the ring (b) and slide the second ring (c) over the braid and the first ring (b). Screw the last ring (d) at the rear of the backshell. If necessary, fix the extra braid on the outer jacket of the cable. If this installation (double folding of the braid) is not possible, refer to figure 5: Slide the first ring (b). Release the braid and cover the backshell (a) and the connector's shell. Cut the braid as shown. Slide the second ring (c) over the braid and the first ring (b). Screw the last ring at the rear of the backshell.

5. Then, Install the heat-shrink moulded piece.

VG95319 Backshells

These backshells are suitable for **PowerSafe** connectors and ensure the shielding by clamping the braid with a screwing system (single conus style).

Shell size	Backshell VG Standard	Shrink boot	Adhesive	Micro Clamping Band	or	Standard Clamping Band	Tool for Micro Band	Tool for Standard Band

All dimensions are given for information only and are in mm, except as otherwise specified | *in mm: 1mm=0.03937 inch

POWERSAFE / VG96944 - BACKSHELLS

TV35 Backshells

TV35 and TVB35 band backshells provide a full 360° shield termination with a quick, easy and cost effective cabling process. They are available with different cabling chamber lengths and exit diameters. The use of replaceable bands facilitates future maintenance or reparability. Sealing is ensured by straight or right angled heat shrink moulded piece at the rear of backshell.

See part how to order page 19

POWERSAFE / VG96944 - PROTECTIVE CAPS

Main features

- Available for Plugs, Jam nut and Square receptacles
- IP 68 (permanent sealing)
- Protection against dust, water and moisture
- EMI function
- Nylon cord, stainless steel rope or metallic chain
